

Research with a purpose

International Maritime Research Confluence

Organized by ISF Institute of Research & Education (IIRE)

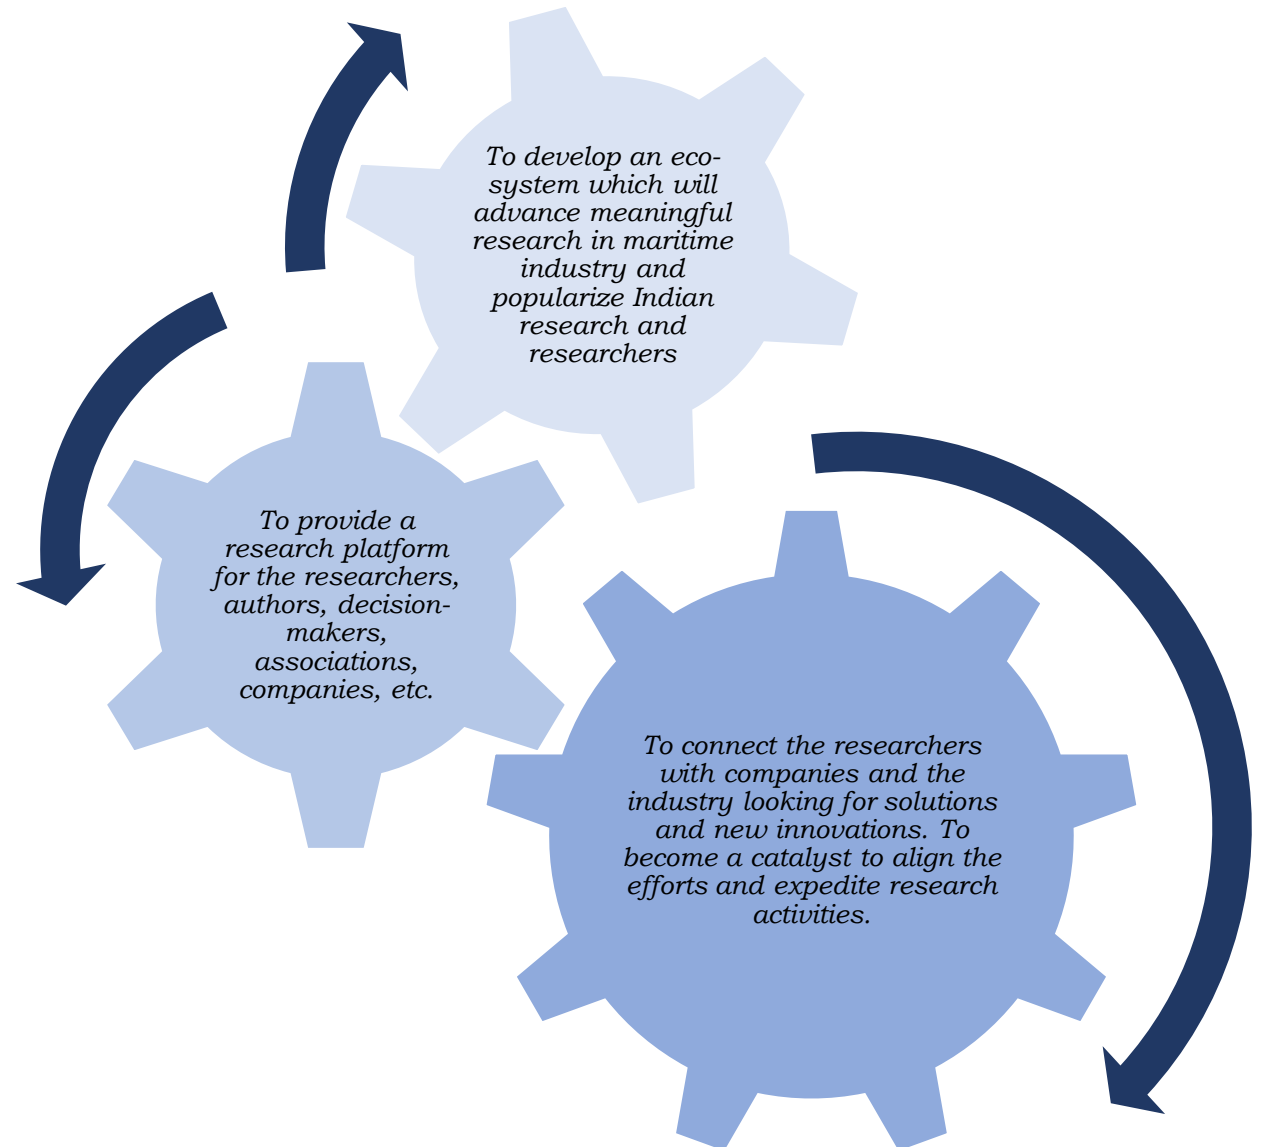

**IMRC
2020**

<http://researchconfluence.iire.in/>

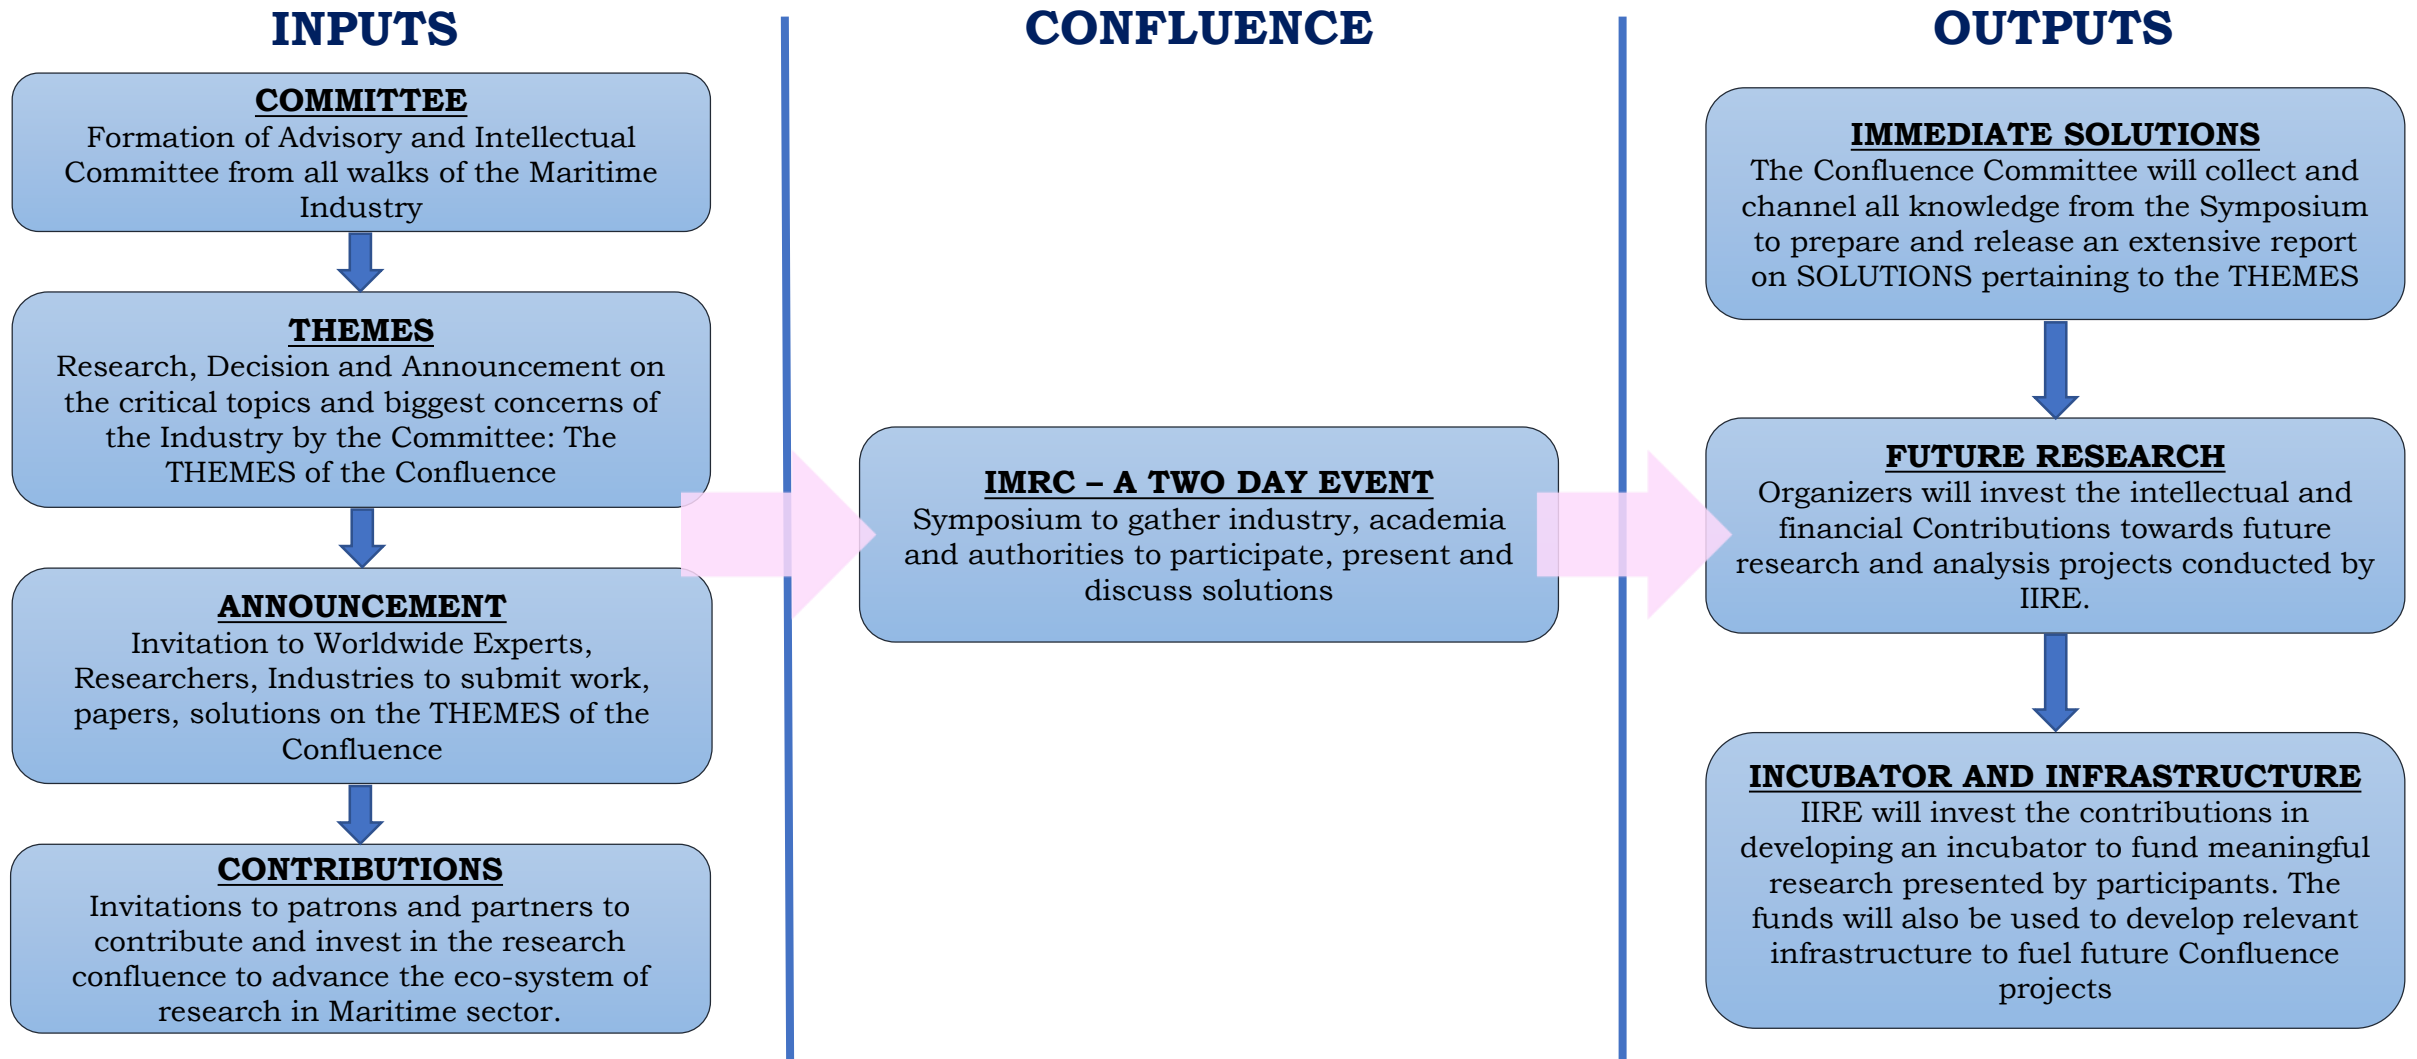

13th and 14th February 2020, Mumbai

Aims and Resolution of the IMRC

- With the Organizing Group on the threshold of entering the third decade, the trustees and directors of the group entities resolved in March 2019 to dedicate the decade 2020-2030 in pursuit of supporting the Sustainable Development Goals set by the United Nations in 2015.
- Relying on the expertise of the group in research activities and publication, our research enterprise embarks on organizing biennial International Maritime Research Confluences (IMRC) from 2020 onwards.
- International Maritime Research Confluence aims to advance the research activities and support creation of the much-needed Eco-System which will encourage and facilitate authentic and meaningful research in the maritime and allied sectors. The event aims to further the research eco-system in the maritime industry.
- The first confluence is to be held in Mumbai on the 13th and 14th February 2020. The outcomes of the confluence shall be disseminated in the industry, further research encouraged and promoted, and effective dialogue facilitated within the industry in the direction of making our world a better place to live.

Modus Operandi of the IMRC

Key Elements of IMRC

Key Note Sessions
from Industry Experts

Paper Presentations
by Researchers

Facilitated
Deliberations

Industry EXPO for
exhibiting new patents
and industry solutions

Poster Presentations
by Researchers and
Students

Who should attend

- Ship Owners
- Ship Yards
- Investors and Decision Makers
- Port and Terminal Authorities
- Ship Managers
- HSSEQ Professionals
- Designers and Engineers
- Individual Researchers and Authors
- Academic Establishments
- Equipment and Machinery Manufacturers
- Manning and Crewing Agencies
- Classification and Statutory Societies

Disciplines covered at IMRC
