# HAZINVENT

**HAZINVENT** is an integrated closed loop system with an Android based Mobile app and a Website interface to seamlessly develop Inventory of Hazardous Materials on board vessel as per the IHM requirements.

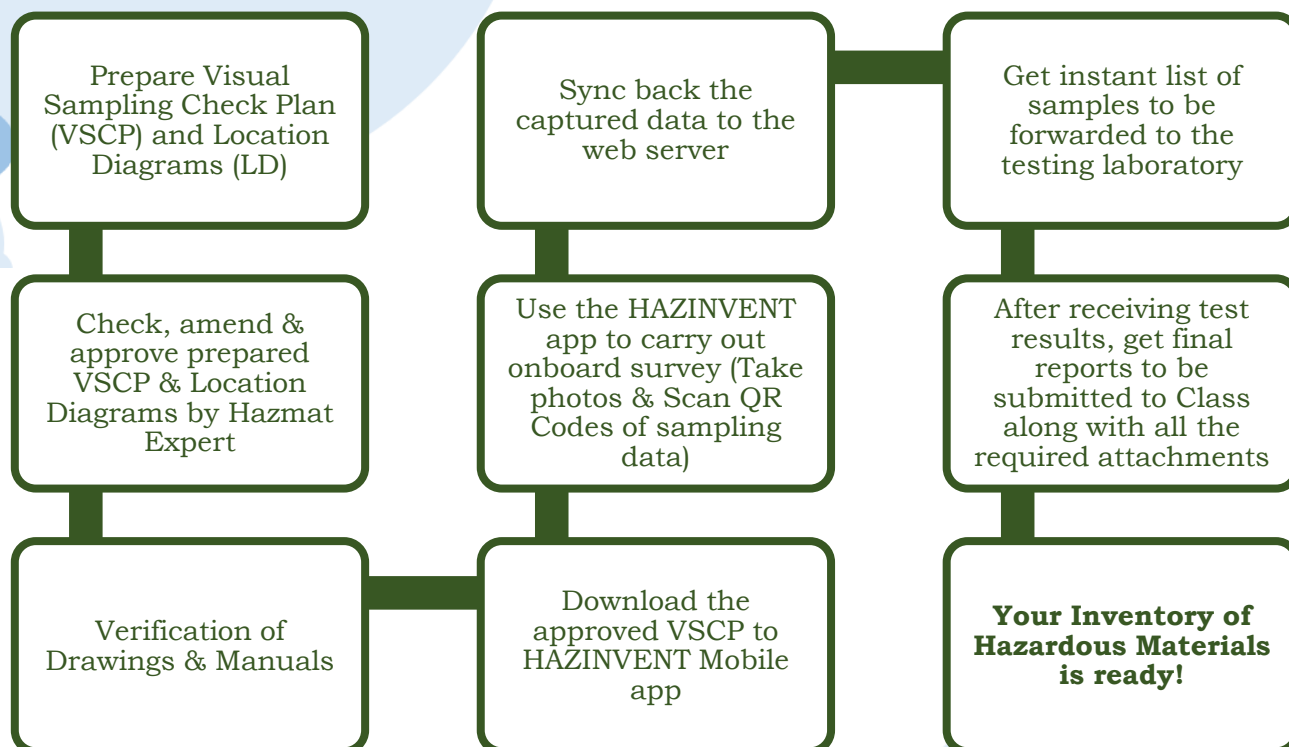

Figure: Flow of the HAZINVENT

## Features of HAZINVENT

**Android App**  
 Availability of VSCP on android app for HAZMAT professionals to capture photographs of locations onboard, scan barcode of sample bags & input remarks  
*Can be used by 2 auditors at the same time for the same vessel.*

**VSCP made easy**  
 Generating vessel specific check plan (VSCP) for each vessel based on vessel specific GA, machinery arrangement and insulation plan and other documents  
*VSCP of sister Vessels can be copied to create new VSCP*

**Access to all**  
 Separate login for Owners, Classification societies and Laboratories  
 Facility to create Unlimited Profiles and Inventories

**Reports and Attachments**  
 Facility to attach various plans, documents and Lab Reports  
 Facility to crop plans from PDF and Images

**Data Sync**  
 Easy transfer of vessel data to web server on completion of survey

**Administrator Panel**  
 Web based administrator function for creating sub admin, clients, classification societies, laboratories and vessel groups

The team behind HAZINVENT comprises of a group of marine professionals having more than 35 years of cumulative marine expertise and a group of IT professionals having more than 32 years of cumulative experience in shipping domain.
